TUG GUIDELINES

TUG REQUIREMENT FOR SHIPYARD MOVEMENTS

1. The table provides for the number of tugs to be assigned to a vessel when berthing/unberthing or shifting at the shipyard.
2. For vessels proceeding to a Floating Dock or Graving Dock, the shipyard may assign an additional tug.
3. For jack-up oil rigs, 3 suitable big tugs are recommended and for semi-submersibles 4 suitable big tugs are recommended.
4. The pilot may in consultation with the master, cancel or order additional tugs if necessary. For vessels equipped with a suitable thruster in good working condition, one tug at that position may be dispensed with.
5. The shipyard may arrange its own tugs for the movement. Please consult the respective shipyard for advice when ordering tugs.
